Package: NormalityAssessment (via r-universe)

September 11, 2024

Type Package

Title A Graphical User Interface for Testing Normality Visually

Version 0.1.0

Maintainer Christopher Casement <casementc@gmail.com>

Description Package including an interactive Shiny application for testing normality visually.

NormalityAssessment: A Graphical User Interface for Testing Normality Visually

Description

The NormalityAssessment package creates plots for assessing normality. The methods implemented are based on recent development made in graphical inference. In the app, the features in the 'Explore Simulated Data' tab enable the user to run the Rorschach procedure, and those in the 'Include Your Data' tab allow the user to run the line-up procedure.

runNormalityAssessmentApp

Run the NormalityAssessment Shiny application

Description

Runs the NormalityAssessment Shiny application.

Usage

```
runNormalityAssessmentApp()
```

Value

There is no return value.
